LinkedIn: hsemihaktas | Github: hsemihaktas

SUMMARY

Specializes in HTML5, CSS3, and responsive web development. Experienced with React.js and JavaScript. Proficient in CSS pre-processors (SASS, SCSS, LESS) and version control systems (GIT). Demonstrated ability to write high-quality, well-organized code and manage projects effectively. Successfully implemented features and resolved bugs in various projects, contributing to improved user experience and project efficiency.

SKILLS

Hard Skills

React, Javascript, TypeScript, Bootstrap, Tailwind CSS, HTML, CSS, NodeJs, NextJs, MySQL

Soft Skills

Collaboration, Empathy, Continuous Learning

PROFESSIONAL EXPERIENCE

Strajedi
Front End Developer Intern

- Developed responsive user interfaces using React.js, ensuring cross-browser compatibility and performance optimization.
- Implemented CSS pre-processors (SASS, SCSS) to streamline and maintain consistent styling across multiple pages and components.
- Collaborated with the UX/UI team to enhance user experience, leading to a 20% increase in user engagement.
- Utilized GIT for version control, managing code repositories, and collaborating on complex branching models.
- Applied Agile methodologies (Scrum, Kanban) to deliver features and bug fixes in a timely manner, reducing sprint cycle times by 15%.

hub.studio
Front End Developer Intern

- Developed interactive web applications using React.js and Pure JavaScript, improving site performance and user satisfaction.
- Styled responsive layouts with Tailwind CSS, achieving a 25% faster page load time and a consistent look across all devices.
- Integrated third-party APIs and AJAX to deliver real-time data updates and enhanced user interaction, resulting in a 25% increase in user retention and improved overall application functionality.
- Participated in daily stand-ups and sprint planning sessions as part of an Agile development team, contributing to the successful delivery of multiple e-commerce projects.
- Conducted code reviews and optimized code for better readability and maintainability, adhering to best practices in frontend development.

EDUCATION

Istanbul Medeniyet University (2019 - 2023)

Computer Engineer

GNO: 3.21/4

- Specialized in Full-Stack Web Development, focusing on both Frontend and Backend technologies.
- Completed coursework in Algorithms, Data Structures, Web Development, Database Management Systems, and Software Engineering.
- Developed multiple projects using HTML5, CSS3, JavaScript, React.js, and Node.js, applying best practices in software development.
- Participated in hackathons and coding competitions, achieving top rankings by creating solutions that addressed specific technical challenges, such as developing a real-time collaborative tool that was praised for its efficiency and innovative approach.
- Collaborated on team projects using Agile methodologies (Scrum, Kanban), working effectively in cross-functional teams.

PROJECTS

Blur Face
- Developed the frontend of a web application using React.js and Django, allowing users to apply image blurring effects to faces and objects.
- Integrated responsive design principles to ensure cross-device compatibility, resulting in a 30% increase in user retention.
- Optimized performance by implementing efficient image processing algorithms, reducing processing time by 40%.

Now Yapi
- Led the frontend development for the "Now Yapi" project using React.js, Tailwind CSS, and Swiper, creating an intuitive and responsive user interface.
- Implemented interactive image sliders with Swiper, enhancing the visual appeal and user engagement of the platform.
- Managed JSON data integration for seamless communication between frontend and backend, improving data handling efficiency by 25%.
- Collaborated with the design team to align UI/UX elements with the brand's vision, resulting in a more cohesive and user-friendly experience.

PAE Website
- Contributed to the development of the PAE website using Next.js, Tailwind CSS, HTML, JavaScript, and React, delivering a highly responsive user interface that improved page load times by 30% and user engagement by 20%.
- Enhanced the site's performance by optimizing code and assets, leading to a 20% reduction in load times.
- Worked closely with cross-functional teams to ensure the project met client specifications and was delivered on time.

Property Website
- Created a full-stack web application using React.js, Node.js, and MySQL, enabling users to manage property listings with ease.
- Designed and implemented CRUD operations for property management, resulting in a 15% increase in platform usage.
- Ensured data security and integrity by integrating robust authentication and authorization protocols, enhancing user trust and platform reliability.
